

Front End Task

Requirement -

- 1) You need to design the UI exactly same as attached below
- 2) In side bar create static pages with heading in between of the page for home and Movies and is highlighted when selected
- 3) Design and working functionality needs to be implemented only for TV Series tab
 - 3.1) On top of this page show current date and time
 - 3.2) There are 2 tabs as attached My series and Popular
 - 3.2.1) In my series select any 3 series as per your choice with default 1st selected
 - 3.2.2) The yellow section marks the selected TV series, i.e. if you click on Mr. Robot, you will get it's details in the yellow section
 - 3.2.3) The selected series imdb rating will be shown in the chart below. In the attached file, you can see that the ratings of all the seasons are mentioned as 7.6, but you are to mention the actual ratings of the seasons from the data you'll be fetching.
 - 3.2.4) For popular there will be 5 series as per your choice with same functionality done in my series tab
 - 3.3) Sorting will be as follow -
 - Alphabet (a-z)
 - Alphabet (z-a)
 - Rating (low to high)
 - Rating (high to low)
- 5) You can fetch the details of the 'TV series' from omdbapi.com, the necessary documentation and usage is available on the website itself.

Bonus points on -

- 1) Design made in Material UI and is mobile responsive
- 2) Use of Hooks
- 3) Implement search as show in the attached file

Output -

You need to send the code with proper screenshots
